JobsGPT by SmarterX.ai

Start a new chat with JobsGPT and enter your job.

What are some ways you could save time with Gen AI?

Pick one task that stands out to you and ask for it to be broken down into subtasks. List four subtasks and classify them as Quick Wins, Definite Don'ts or In-Between cases.

How might you test one of the in-between cases?

Start a new chat and ask it to forecast new jobs for someone who has your current job.

What jobs may exist in the future that interest you?

What skills are needed for those jobs that you don't yet have?

How might you get those skills?

Which key takeaways stand out to you?

Implementing Gen AI at Work

Innovation Profs • innovationprofs.com

Your business / department / role

1. Understand the Tools available

List the generative AI tools you will use:

2. Know tools and limitations

Limitations you should consider:

3. Identify target tasks and align with tools

Tasks

Tool that can help
